- c. In addition to (a) and (b) \$0.54 per pound of suspended solids [minimum charge of \$130.00 per meter).

The sewer charge for industries will be based on actual monitored usage with flow being determined by water consumption or measurement of wastewater by a suitable continuous recording device. Where Biochemical Oxygen Demand and Suspended Solids are less than 200 mg/l, and 220 mg/l, respectively, the industrial rate shall be calculated at a rate equal to the commercial rate.

If the concentration of the wastewater from any user, except those subject to the Industrial Rates above, exceeds the level of 200 mg/l Biochemical Oxygen Demand and 220 mg/l Suspended Solids, they will be subject to a surcharge for that portion of the contribution which exceeds those limits. The surcharge will be the same rate for the Biochemical Oxygen Demand, Suspended Solids as specified in part 3 under Industrial Rate.

If the actual additional cost associated with high strength wastes which are not recovered by the industrial rate charges or above surcharges, the City shall have the option to review the effect any user (all classifications) has

on the wastewater system and establish a higher rate, if necessary, for the excessive amounts of Biochemical Oxygen Demand, Suspended Solids or other applicable pollutants.
